The elegant Origami Cabinet has a multitude of uses. The space behind each of the three doors has one adjustable shelf and a 2'' grommet to allow for wiring of electronic components. It can also function as a sideboard or a focal point for any room. Made of mahogany solids and veneers with a medium walnut finish. Three doors are finished in ivory faux parchment lacquer that perfectly accent two large dramatic solid brass pulls with a natural finish. The steel base has a gold leaf finish. Color reference 121.
